*\* In an effort to mirror the data collection process of the FL Department of Education, internal data is collected from graduates during the months of October – December following the academic year the students graduated. Calculations are based on the number of graduates who responded to a survey conducted by the Career Services department.*

*\*\* Beginning in the 2014-2015 data, the FL Department of Education began “masking” data points that are  $n < 10$ ; thus, some reports show that data for those continuing education (Both Bachelor and Master) and employment data for those who received master’s degrees were “masked”. Consequently, the placement rate summary may not be accurate.*

*\*\*\* Data from the FL Department of Education is always two academic years behind the current academic year. Therefore, internal data for a given academic year will be displayed prior to receiving the data from the FL Department of Education.*
